Continuation Sheet (PTO-303) 09/423,085

Application No.

Continuation of 2. NOTE: The new method limitations of claim 20 (the amount of egg yolk and water, the spraying temperature, and moisture after spray drying) that were not previously presented in the independent or dependent claim and would require further consideration and search. Dependent claims 24-26 also include method steps that were not previously considered. The newly presented product-by-process claim 20 is broader than previously presented product claim 13 and would require further search and consideration because the patentability of product-by-process claims is based on the product itself and not the method of production.
